## Set In Concrete COLLECTION

Taking a somewhat unique approach to replicating the traditional visual of aged concrete, these patterns were derived from the natural reaction of salt being added to washes of watercolors. The salt naturally absorbs pigment in interesting and organic patterns creating a stained effect.

RESILIENT

# Set In Concrete COLLECTION

Capturing the organic movement found through the natural weathering process, **SET IN CONCRETE** is a two style LVT collection encompassing the subtle shifts in pattern found within aged concrete finishes.

**AGGREGATE**
