FOR MORE THAN 20 YEARS, ECOWORX® CARPET TILE HAS TRANSFORMED SPACES. THE INDUSTRY’S FIRST CRADLE TO CRADLE CERTIFIED™ CARPET TILE, IT’S DESIGNED FOR PEOPLE AND THE PLANET. AS OUR COMMITMENT TO SUSTAINABILITY, AT THE END OF ITS USEFUL LIFE, WE WANT IT BACK.

CLOSING THE LOOP /
100% recyclable, EcoWorx® carpet tile becomes the raw material for its own production. When you send it back, you’re part of the life cycle.

TRANSFORM
In 1999, we launched EcoWorx®, a revolutionary new PVC-free carpet tile – the first flooring product to be Cradle to Cradle Certified™. Following the Cradle to Cradle® “safe and circular” design principles, EcoWorx® is made using ingredients that take into account the wellbeing of people and the planet.

CREATE
EcoWorx® carpet tiles – derived from a thermoplastic polyolefin compound and a reinforcing layer – use 40% less energy in production and are made with approximately 45% recycled content. The ingredient makeup is crucial to the product, as the return and breakdown of the carpet allows it to be made into more EcoWorx® in the future.

INSPIRE
By focusing on people and the planet, we designed EcoWorx® to keep it out of the landfill and ensure we have a steady and continual source of recycled raw materials. When you participate in the re[TURN]™ Reclamation Program and allow us to pick up your flooring at the end of its useful life, you help expand upon the almost 1 billion pounds of carpet we have reclaimed to date and kept from entering a landfill.

Learn more about re[TURN]™ and our commitment to transform the way we think about and use carpet by visiting patcraftrecycles.com.
