Enhancing the living experience.

Flooring is the foundation of the built environment. It impacts experiences and provides comfort and support. In the senior living environment, it can transform the way residents and caretakers interact with their surroundings and with each other.

Patcraft designs our flooring to address issues related to safety, comfort, performance, health and sustainability.
OUR COLLECTIONS feature patterns and colors designed to coordinate flawlessly with any interior. By offering a full range of flooring options in broadloom and modular carpet and resilient sheet and plank products, we offer durability, design, protection and easy maintenance for:

- Lobbies
- Corridors
- Dining Areas
- Common Areas
- Activity Rooms
- Rehabilitation and Treatment areas
- Resident Rooms

OUR PRODUCTS AND SOLUTIONS are designed to enhance the safety and comfort of senior living interiors. Flooring is a key factor in creating a safe environment that’s easy to navigate and encourages interaction. We offer solutions to:

- Reduce slips & falls
- Improve acoustics
- Reduce visual distraction
- Encourage greater socialization
- Ease roller mobility
- Provide wayfinding and orientation to the space

OUR SENSES are crucial not only to our vitality, but also to our health. Flooring provides a layer of comfort that can also absorb sound and improve visual acuity. Improving the senses leads to greater social contact and increased enjoyment.

SIGHT
- Flooring can impact sight lines:
  - Glare can cause disorientation, confusion and anxiety
  - Busy patterns and glare can cause eye strain and eye pain
  - Well-designed visuals can help establish pathways

SOUND
- Better acoustics can result in:
  - Lower stress and blood pressure levels
  - Better sleep
  - Higher resident satisfaction
  - Increased visitation, communication and socialization
  - Fewer medical errors
  - Improved morale

Falls can result in more frequent injuries. Patcraft offers safe, non-slip surfaces that can help reduce falls and prevent injuries.

High-Performance Flooring That Protects Your Investment

Floors are easier to clean and maintain with our high-performance fibers and moisture impermeable backings.

We offer a variety of fiber and backing options for senior living applications. Our Solution Q Extreme® fiber can be cleaned with water only, allowing you to choose the performance features unique to your application. Solution Q Extreme and our EcoSolution Q® fiber come with a limited lifetime warranty. Our moisture impermeable EcoWorx Performance Broadloom® backing passes the 10,000 impact and British spill test.

All of our flooring solutions are designed to prolong product lifecycles, make installation and replacement easier and improve maintenance and sustainability.

CARPET CONSTRUCTION & DURABILITY

Eco Solution Q® and Solution Q® Extreme fibers are made of long-lasting, colorfast, fully recyclable nylon 6 that withstands wear and retains appearance. Solution Q Extreme resists the absorption of acid-based liquids when cleaned with water.

EcoWorx Performance Broadloom® provides a powerful moisture barrier (passes 10,000 impacts test) that protects subfloors from liquid contaminants.

EcoWorx Tile® is the industry’s first sustainable, non-PVC tile backing engineered to add a layer of strength and durability.

LokDots™ is an odorless, non-toxic adhesive designed for the installation of carpet tile in occupied spaces. It’s ideal for areas susceptible to high moisture in subfloors.

RESILIENT PERFORMANCE FLOORING

Our Resilient Flooring is constructed to achieve an optimum balance of aesthetic visuals, long-term durability and easy maintenance. The availability of various product profiles (sheet, plank, LVT), easy installation techniques and delivery service supported by company-owned distribution make Patcraft a valued partner for large and small organizations. Most of our resilient products are backed with a 10 year under bed warranty when installed with Shaw 4100 and a 5 year under bed warranty when installed with S150.

SERVICE & MAINTENANCE

We offer turn-key services include professional flooring consultation, project estimating, installation, forecasting/ stock replacement and management reporting.

MAC (Maintenance and Cleaning Tool) provides free, online training programs to help maintain your flooring.
