Patcraft’s heterogeneous resilient sheet flooring is engineered for high demand environments. Manufactured using high performance raw materials, Bounce Back is created to offer unparalleled strength and durability for end use installations. Durability, wear retention, longevity and many other performance requirements drive Patcraft product design so you know when you specify Patcraft, you specify performance.
Features and Benefits

• Absorbs shock and impact, reduces vibration to lessen leg stress, and offers optimum traction and slip resistance for the prevention of injuries.
• Creates subtle spring-like effect to reduce fatigue and allow for more efficient running and jumping.
• Meets NCA-A and EN standards for ball bounce-back percentage and has softer acoustics for a quieter gym.
• Polyurethane coating seals out dirt and eliminates the need for polishes or finishes. Simple maintenance involves daily dry mopping and wet mopping as needed.
• Contains an anti-bacterial surface that eliminates 99.8% of bacteria within 24 hours.
• 6.5 mm thickness is more forgiving over uneven sub floors.
• FloorScore® certified for low VOCs
• 10 year wear warranty

Performance Testing

Coefficient of Friction / EN 13036-A Ø 70.6
Specular Gloss / EN ISO 2813 20–25%
Colorfastness / ISO 105 B02 Passes
Resistance to Wear / EN ISO 5470-1 200 mg
Vertical Deformation / EN 14809 0.8 mm
Indentation Resistance / EN 1516 0.13 mm
Resistance to Impact / EN 1517 No damage
Behavior Under a Rolling Load / EN 1569 No damage
Shock Absorption / EN 14808 ≥ 25%
Ball Reflection / EN 12235 Ø 97%
Chemical Product Resistance / F 925 Mostly unchanged

Environmental

Indoor Air Quality  FloorScore® certified

Maintenance

Patcraft resilient products do not always require a floor finish. However, in certain applications a floor finish may be desirable to aid in stain resistance, resistance to abrasion or increased gloss level.

Construction

Installation

(see patcraft.com for complete installation instructions)

• Flooring material and adhesive must be acclimated to the installation area for a minimum of 48 hours prior to installation.
• Ensure that moisture tests have been conducted and that results do not exceed 8.0 lbs per 1000 sf in 24 hours as per ASTM F-1869, (or 87% when using Shaw 4100) In-Situ relative humidity when tested according to ASTM F-2170.
• ph of concrete sub-floor must not exceed 10.
• Patcraft sheet products are dimensionally stable and will not shrink or compress. If cut too full, product may bubble.
