

# FLOORING SOLUTIONS FOR GOVERNMENT SPACES

Flooring is an essential part of every environment and should be designed to perform in a way that maximizes human potential. Patcraft offers flooring solutions that ground, support and enhance human activities allowing civil servants, citizens and government personnel to pursue their objectives as effectively and comfortably as possible. **Because when it comes to creating a comfortable, secure and accessible environment, flooring matters.**

Patcraft is the leader in high-performance flooring solutions for the commercial environment. Our brand is founded in a long-standing commitment to performance flooring and is backed by an extensive product offering, customer focused service strategies, maintenance and care solutions.

patcraft®

## Performance Design for Government Facilities.

There's a lot to consider when evaluating the foundation of a commercial government space. Several factors influence flooring's performance and appearance retention including construction, installation and maintenance. The right combination of flooring products and solutions are key to protecting your investment for the long-term.

Our knowledgeable support staff is trained to make the detailed process of specifying for government purchasing as easy as possible. With over 100 products on the GSA contract, we offer solutions designed to work in government offices, military bases, airports, convention centers, courthouses and any other government facility.

## Construction Matters

The ingredients that go into a flooring's construction matter to the overall strength, durability, appearance, maintenance, safety, comfort and moisture management.

Our **Eco Solution Q®** and **Solution Q Extreme®** fibers are made of long-lasting, colorfast, fully recyclable nylon 6 that withstands wear and retains appearance.

**EcoWorx® Tile** is the industry's first sustainable, non-PVC tile backing engineered to add a layer of strength and durability.

**EcoWorx® Performance Broadloom** provides a powerful moisture barrier that protects sub-floors from liquid contaminants.

**ExoGuard Quartz™** finish for resilient offers an easy non-wax option and high-performance construction that enhances its strength, pressure and indentation retention. Our resilient products are manufactured to provide maximum comfort and control while reducing moisture and noise levels.

Our carpets are covered by a **lifetime commercial warranty** against staining, edge ravel, zippering and delamination.

Resilient products are backed by performance warranties including 10 year under bed warranties on most products.

## Installation & Maintenance

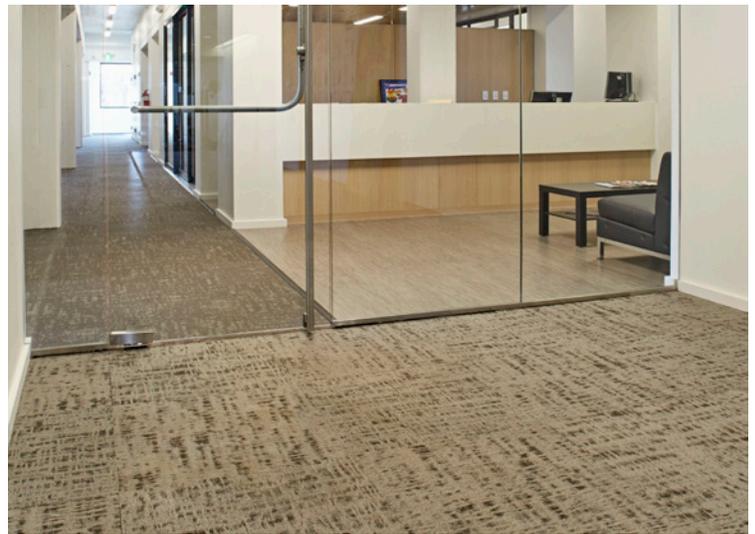

Proper installation and maintenance are key factors when considering sustainable, high-performance flooring that will maintain its appearance under high usage and traffic.

**LokDots™** is an odorless adhesive designed for the installation of carpet tile in occupied spaces. It's ideal for high moisture areas and raised access flooring. Installation with LokDots allows for little set up and downtime and can improve project turn times.

**Resilient Spray Adhesive S150** for sheet, plank and tile offers solvent-free, water based adhesive options for occupied spaces that's low in odor and free from calculated VOCs.

**MAC** is a free online Maintenance & Cleaning tool that provides training for end-users and facility managers to help them develop a maintenance plan to best care for their flooring.

Resilient products are engineered to resist ground-in dirt and particles. Surfaces are easily cleaned with conventional methods such as sweeping and mopping with a pH neutral cleaner and are buff and wax optional.

## Executive Order 13693

At Patcraft, we know that our future matters and we understand the environmental, energy and economic requirements outlined in **Executive Order 13693**. As part of Shaw Industries, Patcraft manufactures products to meet the initiatives of Executive Order 13693, Cradle to Cradle Certified<sup>CM</sup>, NSF 140 certification and LEED point contributions.
