We have carpet tile installation all locked up.
LokDots™—the tool for the job.

LokDots™ is a pressure sensitive adhesive system that will make your next EcoWorx® carpet tile installation easier than ever. Perfectly designed to meet demanding requirements such as occupied space and high moisture installations, this odorless system virtually eliminates VOC emissions—a good thing for installers, end-users and the environment. The ergonomically designed LokDots applicator is lightweight and simple to use—even for the most complicated installations.

**EASY AS 1-2-3.**

All you need: 1 **LOKDOTS APPLICATOR**  2 **ROLLS OF LOKDOTS**  3 **ECOWORX BACKED CARPET TILES**

To use, simply:

1 **LOAD APPLICATOR**

2 **PULL APPLICATOR ACROSS BACK OF TILE** —

   **3 DOTS PER CORNER AND 3 DOTS IN THE CENTER**

   Please reference tile diagrams to the right, as number of LokDots vary depending on tile size.

3 **INSTALL**
Why LokDots?
LET US HELP YOU CONNECT THE DOTS.

LESS IS MORE.

Just four small rolls of LokDots weighing a total of 1.1 pounds are equivalent to one 37-pound bucket of traditional adhesive.

• Our unique applicator makes installation of Ecoworx carpet tile easier and faster than ever.

• Install at your own pace. Traditional adhesives require time to set before tile installation can begin which can lengthen a facility’s downtime.

• Superior to other adhesives. LokDots lateral and lift properties are optimized for worry-free installation and easy replacement.

• Installation is easy—even in high moisture areas. EcoWorx tile when installed with LokDots does not require moisture or pH testing, as long as no visible moisture is present.

• CRI Green Label Plus Certified and Cradle-to-Cradle Silver means it’s good for the indoor environment and the outside world.

• Install over any substrate including concrete, VCT, VAT, cutback, wood and more.

• Odorless, low VOCs, clean means everyone will breathe easier and the building can remain occupied during carpet installation.
Great performance is just the beginning. Easy installation and performance, combined with great design and durability, make Patcraft carpet tiles and LokDots a winning solution in every environment.

LokDots means performance, longevity and durability. LokDots were specifically created for cradle-to-cradle certified EcoWorx backed carpet tiles. Just one more example of how we’re making our carpet last longer and work harder—from the ground up.

Harder working and 97% lighter than traditional adhesive.
